

ULTIMATE: COMPOUND

HOYT ALTUS

Like its big brother the Invicta, the Altus is one of Hoyt's smoothest and most advanced target bows ever. The zero-tolerance limb pockets house Hoyt's all new high performance 13" hybrid limb system for increased speed and reduced vibration. Coming in at a trim 4.6lbs, we were duly impressed. Whether you prefer the forgiving adjustability of the DCX cam or the efficiency and lightning fast speeds of the SVX cam systems; the Altus will deliver.

T.R.U.BALL HBC FLEX RELEASE AID

Designed by Reo Wilde, the HBC Flex is a brass body hinge/back tension release with a black tungsten finish. The finger pieces are specifically designed for the HBC Flex, carrying the taper of the handle body the entire length of the release, with 30 degrees of movement at each pivot location. Extra finger pieces give the release the versatility of a three finger or four finger model. This is one of the most advanced releases available today and builds on the previous well-known GOAT release.

REIGN BOWSTRINGS CUSTOM-MADE STRINGS

Your strings and cables will go through more punishment and wear than any other part of your set-up, so you should make sure they are the best you can get.

Reign Bowstrings, by Simon Scott, are laid out, twisted to length and stretched to over 400lbs of pressure; this removes string creep when fitting to your bow and ensures your cam timing stays put throughout the lifetime of your strings. Available in a number of high quality materials with up to 150,000 different colour combinations.

With nine world titles, Reign's fully pre-tensioned strings offer unparalleled accuracy and zero compromise on quality.

- Starting at £70 for a complete compound set (pricing varies between string material, colour choice and bow model)

MATHEWS TRX

Mathews' TRX range is a firm favourite amongst target shooters; now available in four different axle lengths; 34", 36", 38" and 40", the range has a great winning record, with the two longest risers in particular being most popular amongst the Pro's.

Each of the TRX bows is powered by the highly efficient Crosscentric Cam System with Mathews' new ultra-strong AVS bearings to deliver accurate energy and an incredibly smooth draw.

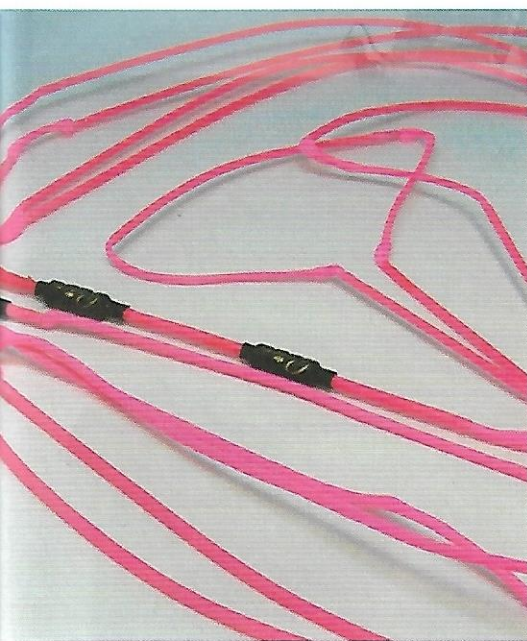

Mathews' easy and efficient C3X cam modules allow you to adjust your draw-length by 1/2 inch without having to press your bow, ranging from 23.5" up to 32" and with let-off options of 70%, 75% and 80%, the TRX range is extremely customisable. The bridged riser design adds rigidity, whilst minimising weight and it boasts a true-centre nocking point to ensure straight and level nock travel.

CARBON EXPRESS NANO PRO RZ

Carbon Express has been a favourite brand amongst compound archers for many years now, thanks to their cutting edge carbon technology and almost indestructible Korean build. Their latest flagship compound arrow the Nano-Pro RZ builds on this legacy. Designed to be the best long distance outdoor arrow in the world, the Nano-Pro RZ is a parallel shaft that comprises of three different spines; a softer more flexible centre 'Red Zone' section and stiffer front and rear sections. This multi spine construction controls how the arrow flexes in flight, helping it to deliver ultimate down range accuracy. Constructed from 46-ton carbon the Nano-Pro RZ is both light and strong and unlike aluminium core arrows won't bend. Buff Tough finish and nock collars to protect the back end of the arrows, mean they should last for several seasons, however much you punish them on the target.

HAMSKEA GEN2PRO THIRD AXIS SIGHT LEVELLING DEVICE

A third axis levelling device should be considered an essential piece of kit by any archer. If you want to invest in the best sight leveller out there, the Hamskea the Gen2Pro easily mounts to any sight and offers a distinct advantage over static sight levelling systems.

The compact sliding design is the only sight leveller to factor in any natural bow torque, thanks to its patented 3rd axis alignment bar. Its light weight aluminium construction is durable and accurate, allowing you to level all three axes at full draw. The Gen2Pro also features a handy turret level and string groove for squaring your bow in a vice; a quality tool for archers who demand the best out of their equipment.

AXCEL ACHIEVE XP UHM CARBON BAR COMPOUND SIGHT

The Achieve XP is the ultimate sight for compound target archers; featuring a thinner, lighter elevation bar and Ultra High Modulus carbon extension, this latest sight from Axcel is both lightweight and durable. The larger knurled elevation and windage knobs make for easier adjustments and can be locked down for added security, while the balanced in-line tensioning system keeps the sight solidly in place, so once set you can be sure it won't budge.

The wedge lock mounting system provides a strong and precise mount that clicks into place, the Achieve even comes with optional metal sight tapes for precise yardage marks.

- Available in 6" and 9" extension lengths.

CONQUEST ARCHERY SMACDOWN.500 PRO FRONT BAR COMPOUND STABILISER

Conquest Archery describes the Smacdown.500 Pro as the MOAB – the mother of all bars! Based off the original Smacdown stabiliser the .500 is 20% stiffer and boasts the best stiffness to weight ratio on a true 1/2" diameter bar. Made from ultra high and ultra high modulus pitch fibre, the Smacdown uses a unique composite dampening material called Smacwrap for the ultimate in vibration dampening and shot recovery. The small diameter and stiffness of the Smacdown.500 Pro makes it one of the best performing bars in the wind and with a mass weight of only 4.7oz its capacity for added screw weights is immense.

- Available in 24", 27", 30" and 33" lengths.
- Side Bars available in 10", 12" and 15"
- Around £320 for the long bar

MYBO REVOLUTION

New for 2021; the Revolution is the latest compound release from British bow designer and manufacturer Mybo. Available in three axle lengths; 34", 37" and 40" the neutral geometry of the caged riser design is engineered for stability, while the refined slim-line grip and modifiable arrow shelf offers comfort and an improved aim.

The 4-track cam system has been developed to incorporate all the advantages of a fixed modular system with the convenience of a rotating module, the result is a cam that performs and feels consistent in every draw length position; long or short.

The enhanced limb alignment system allows you to make micro-adjustments to the position of the limbs without the need for a bow press while precision made Reign bowstrings, fitted as standard, promise unparalleled accuracy and zero compromise on quality. The very best of British!

PSE CITATION

PSE's latest flagship addition to their target bow line-up; the 2021 Citation boasts their stiffest ever deflexed riser with a new shoot through design. Available in 36" or 40" axle lengths, the Citation is engineered with extra wide limb pockets for more adjustable cam spacing, it also features an updated riser lock design to further increase rigidity and a new stainless steel cable rod; the Citation is PSE's most consistent and tunable target bow ever. Available in ten striking colours and two cam options – the legend has indeed been reborn.

LAST CHANCE POWER PRESS DELUXE BOW PRESS

The Rolls Royce of bow presses. The variable-speed electric motor will adjust from 25" to 48" axle to axle in less than 30 seconds and will press bows up to 70lbs in draw weight.

The patented finger system presses the bow exactly as if it's being drawn back, without applying any extra pressure to your limbs or torque to your riser.

Two really cool features; the 1st axis pivot allows you to sit the pressed bow up vertically, while the optional 2nd axis pivot allows you to flip the pressed bow on to its side; making every part of the bow accessible and any adjustments you need to make quick and easy.

SHREWD OPTUM WITH FEATHER VISION LENS SCOPE AND LENS

The Optum is one of the most versatile compound scopes on the market; from its multi-pin positions to the adjustable fibre cover which precisely controls the brightness of the pin, Shrewd have thought of everything. There are a huge range of accessories available including threaded sun shields and precision fit light kits to make shooting in adverse light conditions effortless.

Shrewd's Feather Vision lenses are available in a range of magnifications and utilise Zeiss glass with anti-reflective coating to guarantee a durable and easy-to-clean lens.

- Scope housing available in a range of colours and designs, 35mm or 40mm size options, right or left-handed.
- Scope around £80 / \$170 / €105 – Feather Vision lenses from £90 / \$120 / €125 www.shrewdarchery.com

AAE ARIZONA FREAKSHOW QD COMPOUND ARROW REST

The Freakshow is the toughest micro-adjustable target rest on the market today, available in standard or long mount models. The Sling Blade moves forwards and backwards, allowing you to make adjustments of up to 1 1/2" without ever having to move your rest; torque tuning has never been this quick and easy. It also features laser-etched adjustment lines and oversized lock-down machine screws to make tuning your bow quick and easy and the industry leading Hex alignment connection ensures you never lose your tune when you replace your blades. The QD mount even features an integrated bubble to ensure level and secure fitting to any bow.

- Available in Right or Left Handed.

EASTON X10 PROTOUR

Since its introduction, the compound-specific X10 Protour has won more titles and set more records for compound archers than all other choices combined. Specifically engineered for compound target competition; the Protour is made from lightweight, high modulus carbon fibre with an alloy core. The Protour features a front taper allowing for every arrow size to use Easton's X10 point components. The precisely engineered mass to spine

ratio of each Protour ensures the best ballistic performance at longer shooting distances; giving archers an undeniable edge in unpredictable windy weather. With unmatched precision and legendary durability in even the most abusive target materials on the world circuit, Easton's X10 Protour is at the absolute performance pinnacle for compound target shooting.
